## metro**STOR**®

metroSTOR 8100 SL130 with faceted corner detail and peaked roof option, the SL130 is a highly versatile model from the metroSTOR 8100 Litter Bin range. Manufactured from galvanised steel, colour powder coated with laser cut and timber infill panel options, the SL130 has four apertures as standard and an integral steel liner that can be specified with 90L, 110L or 130L capacity.

metroSTOR 8100 series is a comprehensive range of litter bins for a variety of external applications, from general street waste to at-source recycling facilities.

metroSTOR 8100 Litter Bins are engineered with the same attention to detail and build quality as the well-proven metroSTOR bin housings of which there are over 15,000 units in daily operation. Keeping the essential street litter bin delivering value for the long term defines the metroSTOR 8100 product range, with a class-leading 3 year parts and labour warranty backed by metroSTOR site engineers.

Designed for durability in tough urban environments from the outset, metroSTOR 8100 Litter Bins start with formed galvanised steel assemblies that are welded into a super rigid steel shell. An integral door frame prevents flex in the bin structure that can lead to alignment issues with access door and bin container. The multi-stage chemical pre-treatment process ensures the top quality powder coated finishes maintain integrity over time. Final assembly of the 8100 Litter Bin involves fitting of the access door, latches, aperture options, signage options and the bin container.

Configurable specifications are central to metroSTOR product design and options for the 8100 Litter Bin range are both visual and functional. External bin panels can incorporate laser cut design patterns in steel or timber clad infill panels can be added to soften the built environment. Apex roof type, removable ash tray with integral cigarette stubber, laser cut iconography, signage, seagull access prevention and recycling stream specific aperture control can all be specified at factory order with metroSTOR technical sales specialists providing high quality CGI renders of the selected options to assist in the decision making process

## metroSTOR 8100 SL130 Unit Dimensions

(A)	Width at Top	556mm	(E)	Overall Height	985mm
(B)	Width at Base	536mm	(F)	Door Height	940mm
(C)	Depth at Top	556mm	(G)	Door Clearance	461mm
(D)	Depth at Base	536mm	(H)	Door Swing	110°

PLEASE NOTE: Product dimensions given are correct at time of publishing May 2022.

All dimensions are in millimetres and capacities in litres and don't form any part of the contract.
