

## metroSTOR P-Series Bin Storage Housings (660L - 1280L Capacity)

With over 10,000 units currently in operation, metroSTOR PBM Bin Housings are a well-established, tough and versatile outdoor bin storage solution. By enclosing wheeled bin containers and controlling user access, our products effectively increase recycling rates, while reducing fire risk and issues associated with side waste.

With a design platform that affords flexibility across a number of key areas, metroSTOR PBM Bin Housings accommodate 4 wheeled bin containers as standard, with capacities from 660L to 1280L stored in an open position. Internal features, such as adjustable space bars and internal deflector plates, ensure the correct and efficient containment of waste.

Bespoke hole patterns incorporate an assured sense of visual interest, with the potential for that characteristic to be further enhanced with additional options for green roof designs. This attractive feature showcases environmental scrutiny and encourages an active contribution towards biodiversity, a rising consideration in design.

Reduced fire risk is central to metroSTOR design and where site constraints limit the positioning of bin housings outside of the CFP recommended six metre distance, the units can be specified with fire-resistant enclosure options.

### Touch Free

Bins are stored in an open position allowing touch free deposit of rubbish/recycling through the open apertures

### Waste Stream Control

Front-load enclosure design with signage specific recycling and apertures

### All-Steel Construction

Welded frame assemblies, tough multi-stage color coating

### Varying Capacities

Designed to accommodate 4 wheeled bin containers with capacities from 660L to 1280L
