

## metroSTOR PCL Cycle Lockers

metroSTOR PCL is our primary level cycle locker, providing cyclists with their own exclusive storage facility that is secure and easy to use. While individual lockers can take up twice as much space as a communal store, the additional security offered by this exclusive access will be particularly appreciated by owners of high-valued cycles. Manufactured in the UK by Streetspace, this cycle locker features a low-profile design that inhibits the visual impact on local environments.

Internal security measures deter the likelihood of cycle theft by preventing the attempted removal of panels. Additionally, a full-width hinged door and

an integrated wheel tray enable cycles to be locked safely and securely in an upright position.

Our product is well-suited to locations that neighbour residential properties and communal areas, benefitting users with clear lines of sight that maintain the security of cycles and go a long way towards ensuring the user's peace of mind. Likewise, this significantly negates the likelihood of a fire hazard, often caused by unsuitable internal storage facilities.

### Individual Lockers

Providing residents with their own secure, easy-to-use individual lockers

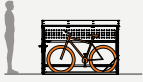

### Customise

A range of cladding options are available to select according to site use, architectural style and surrounding environment

## Product Capacity & Dimensions

### PCL

Model	Capacity	Depth (mm)	Width (mm)	Height (mm)
