

metroSTOR PTH Outdoor Storage Buildings

metroSTOR PTH is the design and manufacture format for custom stores for housing equipment and materials, with configurable specifications for dimension, capacity, access and architectural finishes.

The highly durable steel framed modules of metroSTOR PTH can be selected for your specific site requirements from a broad range of standard cladding options. These include TGV timber and pre-coated steel in a choice of colours, and steel fascia detailing is incorporated with both the standard specification profiled steel roof and the optional integral green roof.

Multiple dimension and layout options can be achieved in 600mm and 1200mm increments up to a maximum 6000mm width and 15600mm

depth, with potential to subdivide the interior and incorporate doors on any elevation. CAD drawings and BIM objects can be supplied for all configurations for efficient integration into your projects, and Streetspace Technical Sales offer a space planning service to optimise capacity within the area available.

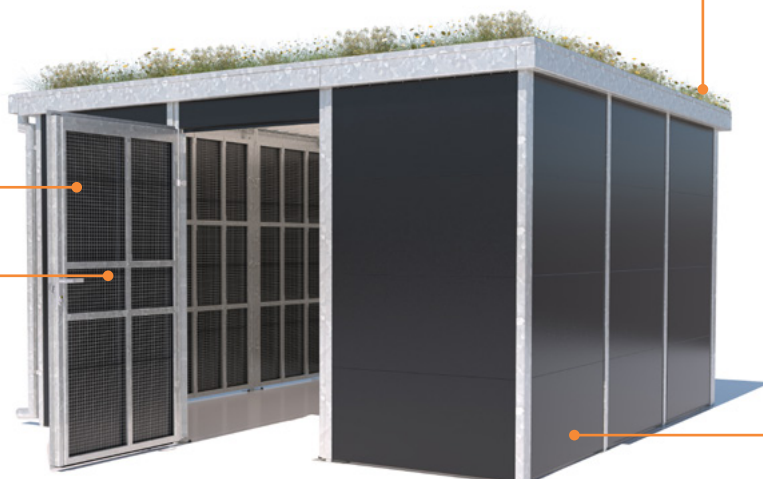

metroSTOR PTH structures are designed and manufactured in the UK by Streetspace under BS EN 9001:2015, BS EN 9001:2015 and BS EN 1090 accredited processes. Hot dip galvanised coating is standard with colour powder coat options. Storage units can be specified at factory order certified to Sold Secure S314 – Silver Specification for Security Cabinets.

Customise

A wide range of cladding options are available to select according to site use, architectural style and surrounding environment

Multiple Door Locations

Are possible within the design format along with 3 door widths

Green Roof

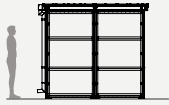

This option not only adds visual appeal but also benefits the environment by supporting biodiversity and promoting natural habitats for birds and insects.

Pre-Engineered

Available with 65 different pre-engineered units
