

metroSTOR 8100 Litter Bins

metroSTOR®

City3 8100 Litter Bin

metroSTOR 8100 series is a comprehensive range of litter bins for a variety of external applications, from general street waste to at-source recycling facilities.

metroSTOR 8100 Litter Bins are engineered with the same attention to detail and build quality as the well-proven metroSTOR bin housings of which there are over 15,000 units in daily operation. Keeping the essential street litter bin delivering value for the long term defines the metroSTOR 8100 product range, with a class-leading 3 year parts and labour warranty backed by metroSTOR site engineers.

Designed for durability in tough urban environments from the outset, metroSTOR 8100 Litter Bins start with formed galvanised steel assemblies that are welded into a super rigid steel shell. An integral door frame prevents flex in the bin structure that can lead to alignment issues with access door and bin container. The multi-stage chemical pre-treatment process ensures the top quality powder coated finishes maintain integrity over time. Final assembly of the 8100 Litter Bin involves fitting of the access door, latches, aperture options, signage options and the bin container.

Configurable specifications are central to metroSTOR product design and options for the 8100 Litter Bin range are both visual and functional. External bin panels can incorporate laser cut design patterns in steel or timber clad infill panels can be added to soften the built environment. Apex roof type, removable ash tray with integral cigarette stubber, laser cut iconography, signage, seagull access prevention and recycling stream specific aperture control can all be specified at factory order with metroSTOR technical sales specialists providing high quality CGI renders of the selected options to assist in the decision making process.

Product Features

Welded Steel Shell

Super-rigid bin structure engineered to prevent flex that can lead to alignment issues over time.

Bespoke Specifications

Add laser-cut iconography, recycling apertures, roof options, ash tray and cigarette stubbers.

Durable Metal Finishes

Multi-stage pre-treatment process for long life powder coated finishes.

3 Year Parts & Labour Warranty

Keep bin units in service long term with metroSTOR nationwide engineers.

Coordinated Design Series

Select bin models and container capacities but keep design form, options and finishes consistent.

Choice of Colour Coatings

Polyester Powder Coated Finishes in standard RAL or BD colours.

Timber Infill Panel Option.

Bring natural materials in to soften the built environment.

Laser Cut Panel Design.

Create added design interest with hole pattern image features.

Roof Type.

Choose between a profile flat or peak roof, all configurable with Ash Tray / Stubber.

Aperture Type Options.

Separate recycling at point of use with recycling specific apertures.

Signage & Iconography.

Laser cut iconography to WRAP recycling signage available to specify at factory order.
